3. Budget Narrative & Financial Justification

Direct Personnel Support: The project allocates \$37,200 (51.3% of the grant) to direct personnel expenses. The Community Coordinator (\$18,000) provides 20 hours/week dedicated supervision, volunteer coordination, and school liaison work. Two Lead Learning Facilitators (\$15,360 total) deliver 32 weeks of direct academic tutoring across both sites at an hourly rate of \$16.00/hr, while a specialized STEM tutor (\$3,840) delivers 160 hours of structured technology labs.

Capital & Equipment Purchases: Laptops are budgeted at \$450/unit for 20 units (\$9,000), protected by 2 rolling locking carts (\$1,400). These assets will remain the ongoing property of BrightPath Community Initiative and be retained at the community centers for long-term youth use.

Evaluation & Compliance: \$3,500 is specifically ear-marked for objective outcome assessments, including licensed standardized diagnostic tools and an independent review consultant.

Financial Certification: I attest that the expenditures described above represent an accurate, non-duplicative, and realistic cost forecast directly necessary for the execution of the Community Learning Hubs project.
